FOR IMMEDIATE RELEASE

OTTO MEDIA OFFERS AERIAL PHOTOGRAPHY AND VIDEOGRAPHY

Syracuse, N.Y., (February 26, 2015) – Otto Media has invested in an aerial photography and videography quad copter expanding our production services.

Aerial videography and photography are a great way to show a different perspective for residential and commercial real estate and commercial leasing. Aerial footage adds a whole new level of production value to television commercials and corporate videos.

Otto Media's quad copter is equipped with a HD 3D 3-Axis stabilizer which enables fluid motion of aerial video shots. A first person view or FPV monitor enables wireless viewing of the composition of the shots while filming or taking photos, enabling the client to know exactly what they will be receiving. The quad copter carries a Hero GoPro 4 Black camera which captures vivid 4K resolution video footage and 12 megapixel still photos. Otto Media uses enhanced editing techniques to correct lens distortion caused by the GoPro's wide angle lens.

Otto Media specializes in the creation of traditional and innovative media for local, national and international businesses. The agency leverages the latest technology to deliver high production value with scale to accommodate small to large business marketing and advertising budgets. Otto Media is headquartered in Syracuse, New York and serves clients throughout the United States.
